Jefreeze OAT 50%

CONCENTRATION	FREEZING POINT	BOILING POINT (REFLUX)	PH
50 %	<-30 °C	>110 °C	8

DESCRIPTION

Jefreeze OAT is a long Life Coolant based on the most advanced Organic acid technology (OAT), protect all engines from frost damage It also provides outstanding protection against rust and corrosion for all parts of the cooling system and is therefore recommended for all year round use. This Ethylene Glycol based antifreeze, designed to meet the demands of modern engines and their cooling systems.

FEATURES AND BENEFITS:

- Long-Life Protection: Effectively protects against engine freezing and overheating over an extended service life.
- Corrosion Defense: Delivers excellent protection for all components of the cooling system, including aluminum.
- Clean System Performance: Prevents limescale and deposit build-up to maintain system cleanliness and efficiency.
- Compatibility: Designed for use in passenger cars and light-duty commercial vehicles with gasoline or diesel engines.
- Safe for Seals and Gaskets: Compatible with rubber hoses and gasket materials, preventing leaks and wear.
- Ready to Use: Pre-mixed with demineralized water for convenient application—no dilution required.
